

Gloria Krüner Home Staging Course (Russian Language)

Gloria Krüner's School of Home Staging and Redesign was established in 2019 to spread the ideas of Home Staging about the Russian speaking community all over the world.

Being a certified Home Stager and a member of EAHSP and IAHSPP, inspired by the mission of Barb Schwarz to stage the world, Gloria decided to stage the post-Soviet real estate market. Her mission is to bring high international educational standards to the post-Soviet area countries and improve their aesthetics.

She created the first accredited Home Staging course in Russian, **Home Stager as the Most Delicious Profession of the XXIst Century**. The program consists of two parts. The first one will guide you through all the Home Staging techniques — prestaging, color schemes, arrangement of furniture, focal points, etc. The 2nd part will teach students how to run a Home Staging business. It includes project management tools, marketing activities, legal and financial advice. All video lessons are structured and placed on the learning platform. Moreover, you will practice your skills through home tasks and assistance of tutors. And every week students can take part in online group sessions.

The Gloria School gives systematic and high-quality education. Her graduates work already in 9 countries including Russia, Ukraine, Germany, Turkey, Cyprus, Greece, etc. They proved the efficiency of the program by succeeding in European competitions of Home Staging professionals.

Beginners will learn all basic Home Staging techniques.

Advanced students who started their business but did not graduate any professional courses will get all necessary tools to develop and strengthen their personal brand in Home Staging.
